Fire Inspector Date

State and local “tent codes” have Changed. Please familiarize yourself with all the applicable requirements of all the codes. (State Fire Code sections regulating tents is attached for your review)

Tents shall not be erected, without first obtaining a permit except tents, not exceeding 110 square feet erected on premises designated for one-family dwelling use and being used as such.

All applications require a **site illustration** with sizes and tent distance from lot lines, buildings and other tents.

Detailed **site and floor plans** must be submitted indicating seating arrangement, exits arrangement, heating and electrical equipment for tents more than 110 sq. ft.

Tents erected on **elevated platforms** must have an architect or an engineer’s stamp attesting to structural stability. Handrails and guardrails must also be provided as required by the Code.

Guy ropes, stakes and other support equipment adjacent to or in the path of exits travel must be effectively enclosed or guarded to protect persons from injury.

Tents shall not be installed in **driveways** so as to block emergency ambulance and fire vehicle access to other structures located on the property.

Use: Village code permits tents to be installed no more than 48 hours prior to the permitted event and all tents must be removed within 48 hours following the permitted tent event.

Combustible materials for decorative purposes are not permitted unless approved flame-resistant. Documentation and or tests will be required accordingly. Certificates should be **submitted as early** as possible but not less than 2 week prior to event.

Open flame devices, including candles, shall not be permitted inside or within 20 feet of the tent while open to the public. Alternate devices, similar in nature, must be expressly approved by this Office. Actual samples should be **submitted as early** as possible but not less than 2 week prior to event.

Portable fire extinguishers, with minimum 2A:20B:C rating, shall be provided in tents as required by §F906.

Electrical wiring & equipment shall conform to the National Electrical Code. **Lightning** protection is not required – a tent is **not** the place to be during a storm!

Tent permits must be conspicuously posted from date of tent setup to tent removal.

Standby Personnel (crowd managers or fire watch detail) when required shall be approved and shall remain on duty for the duration of the event. Arrangements for such must be approved by the Fire Inspector not less than 2 week prior to event.

NOTE: The **applicant** is responsible for communicating all applicable tent regulations and provisions to those persons supplying or installing any tent, to all persons supplying or installing materials to decorate or illuminate any tent, and any other persons that will supply utilities to the site or tent, including site owner, renter and the organizer(s) of the event.

The application must then be returned to the Fire Inspector, along with The Certificate of Insurance naming the Village of Scarsdale and its agents as additionally insured.
